5000

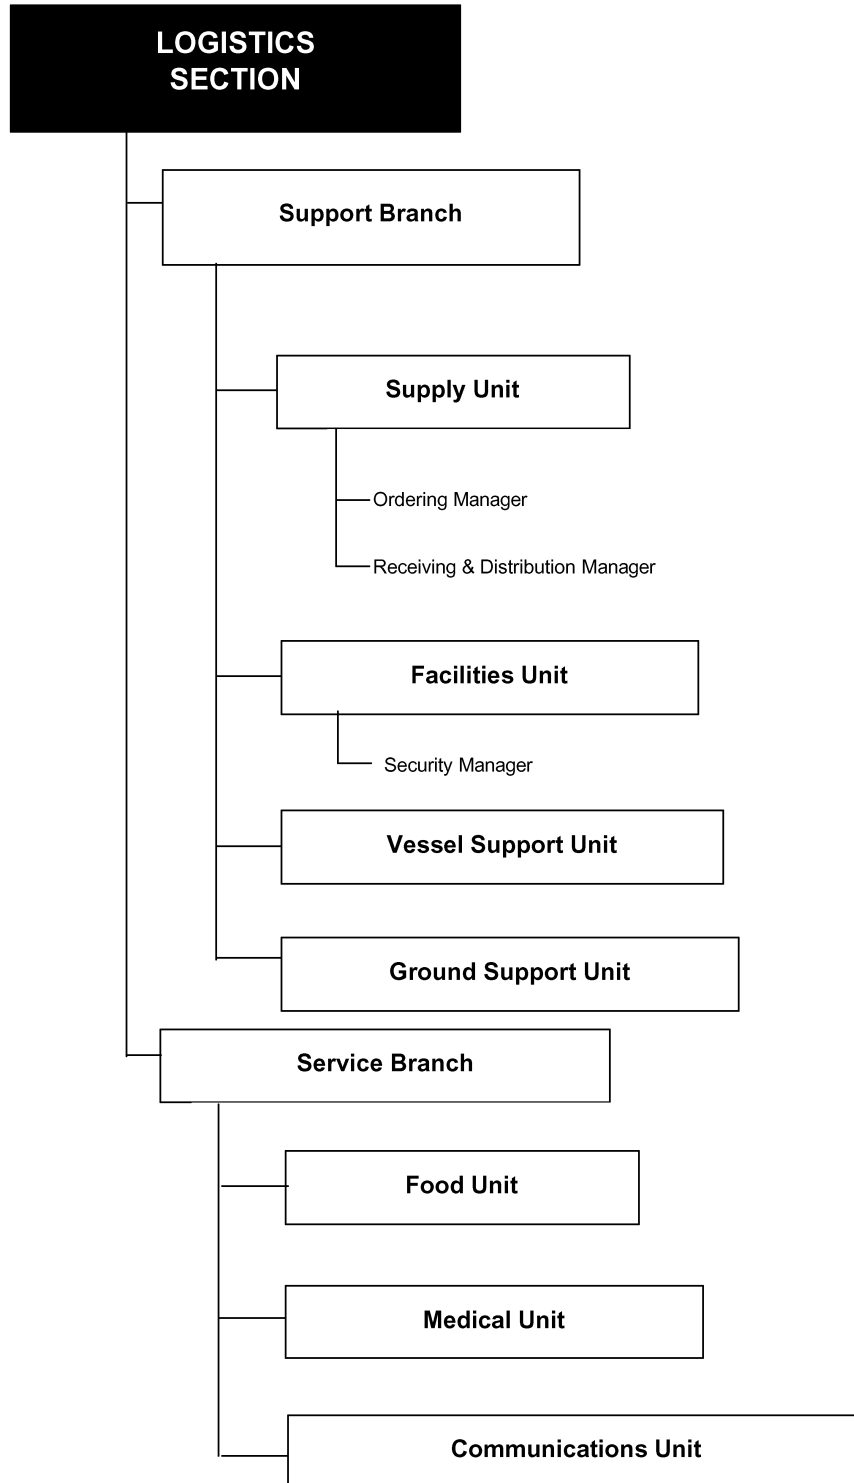

Logistics

5100 Logistics Section Organization

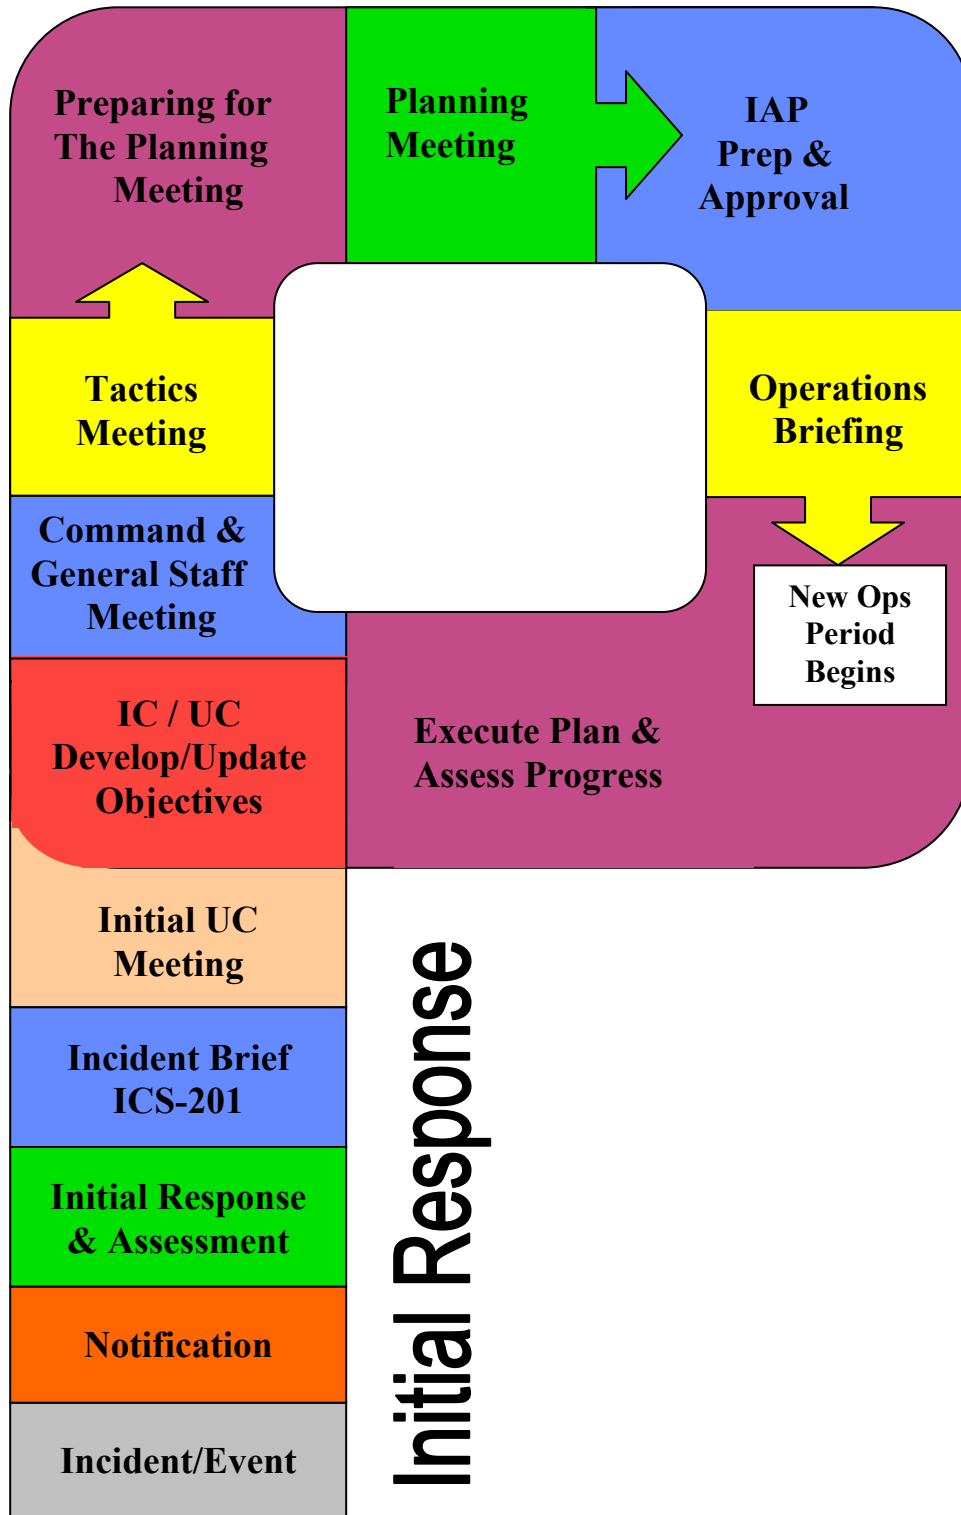

The following is an organizational chart of the Logistics Section and its subordinate units. It serves as an example and is not meant to be all-inclusive. The functions of the Logistics Section must be accomplished during an incident; however, they can be performed by one individual or can be expanded, as needed, into additional organizational units with appropriate delegation of authority.

Information regarding the Logistics Section and Staff positions within the command can be found in Oil Spill Field Operations Guide (FOG) ICS-OS-420-1 dated June 2000. For positions or incident types not addressed by the FOG, refer to the US Coast Guard Incident Management Handbook 2006 Edition, (COMDTPUB P 3120.17A Aug 2006).

LOGISTICS SECTION

Figure

5110 Logistics Section Planning Cycle Guide

5200 Roles and Responsibilities

The Logistics Section is responsible for providing services and support to meet all incident or event needs. This is accomplished under the direction of the Logistics Section Chief. Logistics service and support to an incident or event are important functions. Early recognition of the need for a separate logistics function and section can reduce time and money spent on an incident. All Functions not assigned by the Section Chief remain the responsibility of the Section Chief.

5210 Logistics Section Chief Responsibilities

The Logistics Section Chief, a member of the General Staff, is responsible for providing facilities, services, and material in support of the incident. The Logistics Section Chief participates in development and implementation of the Incident Action Plan and activates and supervises Branches and Units within the Logistics Section.

5220 Service Branch Director

The Service Branch Director, when activated, is under the supervision of the Logistics Section Chief, and is responsible for the management of all service activities at the incident. The Branch Director supervises the operations of the Communications, Medical, and Food Units.

5230 Communications Unit Leader

The Communications Unit Leader, under the direction of the Service Branch Director or Logistics Section Chief is responsible for developing plans for the effective use of incident communications equipment and facilities; installing and testing of communications equipment; supervision of the incident Communications Center; distribution of communications equipment to incident personnel; and the maintenance and repair of communications equipment.

5240 Medical Unit Leader

The Medical Unit Leader, under the direction of the Service Branch Director or Logistics Section Chief, is primarily responsible for the development of the Medical Emergency Plan, obtaining medical aid and transportation for injured and ill incident personnel, and preparation of reports and records. The Medical Unit may also assist Operations in supplying medical care and assistance to civilian casualties at the incident, but is not intended to provide medical services to the public.

5250 Food Unit Leader

The Food Unit Leader, under the direction of the Service Branch Director or Logistics Section Chief, is responsible for determining feeding requirements at all incident facilities; menu planning; determining cooking facilities required; food preparation; serving; providing potable water; and general maintenance of the food service areas.

5260 Support Branch Director

The Support Branch Director, when activated, is under the direction of the Logistics Section Chief, and is responsible for development and implementation of logistics plans in support of the Incident Action Plan, including providing personnel, equipment, facilities, and supplies to support incident operations. The Support Branch Director supervises the operation of the Supply, Facilities, Ground Support and Vessel Support Units.

5270 Supply Unit Leader

The Supply Unit Leader is primarily responsible for ordering personnel, equipment and supplies; receiving, and storing all supplies for the incident; maintaining an inventory of supplies; and servicing non-expendable supplies and equipment.

5280 Facilities Unit Leader

The Facilities Unit Leader is primarily responsible for the layout and activation of incident facilities (e.g. Base, Camp(s) and Incident Command Post). The Facilities Unit provides sleeping and sanitation facilities for incident personnel and manages base and camp operations. Each facility (base or camp) is assigned a manager who reports to the Facilities Unit Leader and is responsible for managing the operation of the facility. The basic functions or activities of the Base and Camp Manager are to provide security service and general maintenance. The Facility Unit Leader reports to the Support Branch Director.

5290 Ground Support Unit Leader

The Ground Support Unit Leader is primarily responsible for 1) support out of service resources 2) coordination of transportation of personnel, supplies, food, and equipment, 3) fueling, service, maintenance and repair of vehicles and other ground support equipment, and 4) implementing the Traffic Plan for the incident.

5300 Communications

This is a frequency and communications resource summary taken from the Communications Manual provided in section 9660 Communications Manual provides further detail on topics such as communications terminology, equipment setup, types of communications systems, and more.

5400 Area Resources: Infrastructure**5410 Incident Facilities**

Designated incident facilities, such as a Command Post (CP), an incident base, or a staging area, may be established based on the requirements of the incident. The Incident Commander or Unified Command determines when these facilities are established and where they are located.

The CP is the location from which all incident operations are directed. Only one CP is required per incident. Government and private entities should be co-located at the CP to make planning and communications easier. The communications center is usually established at the CP. Incident bases(s) are used for large oil

spills affecting a large geographical area and provide staging areas for equipment and personnel (i.e., small craft launching area, shoreline cleanup access point).

5411 Pre-designated Command Post Locations in the Puget Sound Area

In the Puget Sound Area, major metropolitan areas which have been pre-designated for command post locations are:

- Port Angeles
 - (Strait of Juan de Fuca GRP & Outer Coast GRP);
- Bellingham
 - (North Puget Sound/San Juan Islands GRP);
- Anacortes/Mt. Vernon
 - (North Puget Sound/San Juan Islands GRP);
- Everett
 - (North Central Puget Sound GRP);
- Seattle
 - (Central Puget Sound GRP);
- Bremerton
 - (Central Puget Sound GRP); and
- Tacoma
 - (Central Puget Sound GRP).

5412 Pre-designated Command Post Locations in the Portland Area

In the Portland Area, major metropolitan areas which have been pre-designated for command post locations are:

- Portland
 - (Lower Columbia GRP)
- Astoria or Grays Harbor
 - (Grays Harbor GRP)
- Yaquina Bay
 - Northern Oregon Coast GRP)
- Coos Bay
 - (Southern Oregon Coast GRP)

5413 Pre-designated Command Post Locations in the Inland Area

In the Inland Area, major metropolitan areas which have been pre-designated for command post locations are:

- Kennewick
 - (Mid Columbia River GRP)
- Others T5500
 - Area Resources: Response Equipment
