

## **Updates to the oiled wildlife sections**

Point of contact [Sonja Larson](#)

Description of the work: Make updates to Section 9310 to reflect the latest planning and equipment capabilities. Simplify the format of the chapter. Remove duplications that exist with other sections (for example duplicative position descriptions), review the described response levels and update based on current response posture, consider updating the organization chart to mirror the CalOSPR updated version. Describe the short form wildlife response plan that is implemented early in responses (include template). Additionally, minor updates to the other wildlife sections to verify names, contact info, and equipment inventories.

## **Section 9408 – Resources at Risk, ESA and Best Management Practices**

Point of contact: GRP Workgroup, [Nora Haider](#)

Description of the work:

(1) The Resources at Risk Response Tools updated to include guidance on including shoreline type, oil type, and oil behavior into the ICS 232 form. Distinction between ICS-232 and a RAR Summary could be further defined here as well. This is to move current practices into the plan.

(2) Evaluate if/how information from ESA Biological Opinions (Best Management Practices and other requirements/tools) should be incorporated into GRPs. Make recommendations to the RRT.

## **Updates to JIC and Liaison manuals & 96 Hour Plan relating to communication on oiled wildlife**

Point of contact: [Dan Smiley](#)

Description of the work: Conduct a two-part Communications Workshop focused on communicators who use social media and Incident Commanders who need to provide strategic messaging during spills.

## **Updates to JIC and Liaison manuals & 96 Hour Plan relating to strategic communication**

Point of contact: [Nhi Irwin](#)

Description of the work: Conduct a JIC/Liaison practitioner's workshop focusing on oiled wildlife response and messaging about wildlife impacts during an oil spill.

## **Update to Section 9501 Field Communications**

Point of contact: [Dan Smiley](#)

Description of the work: Update Section 9501 with lessons learned from past responses with new technology capabilities.
